

RAW-HIDE

Rosin Paper

Raw-Hide, brown rosin paper, represents quality protection for floors, cabinets, doors, windows and walls during the last phase of construction and for the many home "honey-do" projects.

Commercial grade Raw-Hide is also a traditional product for general purpose sheathing and drainage ditches. Its designed quality enables it to last for several days on the construction site. And Raw-Hide makes home projects and events easier: protects the floor in the garage, under art projects, birthday parties, makes posters and banners.

Raw-Hide is designed to protect and shield from damage caused by spills, paint, tools and equipment, dirt, gravel and sand. You will always be satisfied with your TrenTek product choice.

RAW-HIDE
