

RIP/GUARD

Rosin Paper

RipGuard is the serious professional's choice in heavy-duty protection paper. RipGuard is not only thicker than other commercial grade papers (such as rosin paper) but it is also reinforced with fiberglass threads to avoid tearing on the job. When quality must be assured RipGuard is the answer!

RipGuard will protect floors, cabinets and countertops from potential damage caused by painters, movers, equipment, ladders, tools, dollies, dirt, gravel and sand – and anything that could tear or allow foreign objects to damage the new surface.

RipGuard also works well in packaging and shipping. Anything from picture frame backing material to wrapping boxes; there is no job too tough. Use RipGuard and make a serious quality statement to your customers.

RipGuard is the top of the line product when it comes to high-tech fiber protection and is yet another quality product from the TrenTek product family.
